VETERINARY RESEARCH

ERRATUM

Open Access

Erratum to: Maternally-derived antibodies do not prevent transmission of swine influenza A virus between pigs

Charlie Cador[1,4*], Séverine Hervé[2,4], Mathieu Andraud[1,4], Stéphane Gorin[2,4], Frédéric Paboeuf[3,4], Nicolas Barbier[2,4], Stéphane Quéguiner[2,4], Céline Deblanc[2,4], Gaëlle Simon[2,4] and Nicolas Rose[1,4]

Erratum to: Vet Res (2016) 47:86
DOI 10.1186/s13567-016-0365-6

After publication of the original article [1], the authors noticed an error in Table 2 in the "Results" section. In the last column the R_0 estimated values have been reversed between groups. Consistently with the text, R_0 is 5.8 [1.4–18.9] for MDA^+ piglets (first row) and 14.8 [6.4–27.1] for MDA^- piglets (second row). The corrected version of Table 2 is included in this erratum.

Table 2 Estimation of the reproduction numbers R_0 for MDA^+ and MDA^- piglets using the best model (model 2)

	Shedding period (days)	Direct transmission rate β ($days^{-1}$)	Susceptibility factor σ	R_0
MDA^+ piglets			0.39 [0.21–0.70]	5.8 [1.4–18.9]
	6.1 [5.9 – 6.4][a]	2.43 [1.09 – 4.23][a]		
MDA^- piglets			–	14.8 [6.4–27.1]

[a] Overall population estimate applying to both groups.
